

Performance TFD

Fast drying and low-friction, resin-bonded PTFE based dry film lubricant

Description

Performance TFD is a fast-drying low-friction resin-bonded PTFE based dry film lubricant. Performance TFD is designed for repetitive movement applications. Moving parts last longer, work harder and need less maintenance when coated with Performance TFD.

Applications

- Coin mechanisms
- Door and window guides/runners
- Wood working tables
- Lock parts
- Saws and planes
- Rack slides
- Wood furniture drawers
- Wood table slides
- Packaging equipment

Typical performance data

Appearance	Translucent
Colour	White
Lubricant	PTFE
Curing	Air dry
Shelf life, months	12

Benefits

- Aerosol packed for convenience
- Clean easy application
- Good adhesion to most substrates
- Low friction
- Durable abrasion resistant surface
- Thin film
- Room temperature cure
- Translucent coating
- Life long lubrication in many applications

Application

Substrates to be coated should be clean and dry, free from contamination and residues such as dirt, grease or powder before applying Performance TFD. Light abrasion with followed by a solvent wipe and air dry will improve adhesion.
