

## RH 200

### Chain and curve fluid for the printing industry

#### Description

Special fluid developed to lubricate chains in MAN Roland and Heidelberg pressing machines. RH-200 is based on a special technology, the presence of special polymers will ensure a clean and safe operation.

#### Applications

RH 200 can be applied manually as well as through central lubrication systems.

#### Benefits

- Protects against wear
- Clean operation thanks to minimal build up of paper dust

#### Typical performance data

Base oil	PIB
Colour	Transparent
Flash point C.O.C., °C	> 210
Viscosity @ 40 °C, mm <sup>2</sup> /s	460
Working temperature, °C	-18 – 255
